

OFF THE RECORD: Here's What Intel Sources Tell Me is Actually About to Happen **(Mike Adams)**

Posted October 20, 2022 on [Brighteon.com](https://www.brighteon.com)

NOTE: Mike Adams is the creator of Brighteon.com (a Christian alternative to Youtube), the creator and host of NaturalNews.com, a scientist, an inventor, author, food scientist, and a Christian. Each week he interviews several people in key positions and organizations and shares these interviews on naturalnews.com and Brighteon.com.

“I have to share with you what guests and hosts say after we have an interview. Part of it is they are cautious about what they say publicly, because they don’t want to say something that they cannot completely verify. And part of it is after the interview is over, they will say: “Oh by the way, there is one more thing...”, and then they will share with me another key insight.

These are individuals in key positions, or individuals who know people in key positions in our government and the private sector, who have insight that the public does not have. In addition, sometimes I receive information from people in agencies who want the public to know what is going on. The following are key insights I gleaned from these important individuals:

They don’t see the stock market surviving past November of December of this year without a drop of 50% or more.

In addition, some large banks will fail, and perhaps be merged with other large banks.

A major financial correction is coming and appears IMMINENT. We are very, very close to this happening. You just can’t keep printing money forever.

We are very close to the end of this monetary system. And in order for those who created these crimes and money looting to cover their tracks of the crimes they got away with, they have to have a bigger crisis, such as a world war.

This is why the United States is provoking Russia into attacking the United States, and also trying to provoke China into attacking the United States.

That was the entire point of the recent executive order from Biden to undermine and destroy the Chinese semi-conductor industry, which basically annihilated China's semiconductor industry overnight.

I have compared that to the U.S. Navy's embargo of energy shipments into Japan that provoked Japan into attacking the U.S. at Pearl Harbor. That was a way to get Japan to attack the United States so the U.S. could claim victim and get massive popular support to oppose Japan in the war.

So it could be that our banking problems would be the least of our problems, because we will be in an escalating world war at the same time.

The financial system is in deep, deep trouble, and the tipping point of financial collapse is almost here. It will probably start in Europe, then Japan, then affect the U.S. stock markets, bond markets, and real estate. Then the dollar will fall, which could take place sometime next year.

We are likely to see the U.S. stock market get hit very hard really soon, within a matter of weeks. This would be followed by, if the markets go low enough, systemic banking failures.

Are we going to make it to election day? I don't know. It is still a couple of weeks out, and there is a lot the deep state could do to try to cancel the election.

The executive order attacking the Chinese semiconductor industry is very similar to the cancellation of Russia from the SWIFT inter-continental banking system, another act of war [that took place months before Russia's invasion of Ukraine]. And it is putting China in a position where it will have to lash out to end the economic suffocation of its semiconductor industry, which is one of its major industries.

This could be designed to draw China into its final attack on the United States that J.R. Nyquist talked about. Do you remember the leaked audio by a Chinese general talking about China moving to a war-time economy and loading ships with military equipment? That

operation has not gone away. And it was very clear that China was making plans to invade the continental United States.

There are now fewer cargo ships crossing the ocean. This provides China with the perfect cover to use cargo ships to hide troops, military equipment, and missiles that could be launched off shore from the containers.

I think China and Russia are working together and planning this together. Note that China just ordered all of its citizens to evacuate from Ukraine [as did India]. So China knows that Russia is going to attack Ukraine [in a massive way].

Some say that Russia will continue to move westward and attack Poland, for example, and at the same time, China will attack the United States, because the U.S. is very weak because it sent so much of its military hardware and supplies to Ukraine [and left a great deal of military hardware in Afghanistan].

The U.S. is in its most vulnerable position ever, historically. China knows it, and Russia knows it, and it looks like all of this is designed to bring down the United States.

The U.S. financial system is so vulnerable that China could cause a shockwave in the U.S. by selling all of its U.S. treasuries, or halting all of its exports to the United States. That would be just massive.

You might say: “Why would they do that? They need the money.” No, they don’t. They are already shutting down factories, and moving to a war-time economy in which they produce military hardware instead of consumer goods. They are using Covid lockdown as a cover to do that. They are no longer going to make stuff for the world, especially the western world.

They are going to make stuff for their war – their war against the western world. They will continue to make goods for Russia, Iran, India, and other allies, but at some point they will stop exporting to the West. And when that happens, that will be an economic shockwave to the U.S. It could be very close.

To wrap this up, people who just listen to mainstream media are unaware of everything we just covered. And they will be destroyed by the financial collapse that is coming. Many, if not most will lose their bank accounts, they will lose the value of the currency they now hold,

they will lose their jobs in many cases, and they will be destroyed by scarcity and price inflation in groceries, gasoline, and all of the essential goods that people have to have in order to survive.

So the unaware people – many of them will not make it. Those who have good information, such as what you are receiving here, you have the ability to look ahead and prepare. You will be ready to move your finances from a failing bank to a solvent bank, like a smaller local bank for example, or some other asset holding that isn't subject to currency collapse [such as gold or silver].

You will have a forewarning here [Mike Adams' Situation Updates and interviews on brighteon.com] in everything that I do, and guests that I interview, and articles on naturalnews.com. For a financial collapse that is working through the system, you may have two weeks to two months advance warning, compared to when the masses totally panic. And that's enough. You can do things during that period of time that can save you.

In terms of a nuclear war or Chinese invasion, you may only get two days warning. But that's still enough to bug out if you are in a city, and if you are ready. But you have to have a place to go, have your bug out bag ready, and the whole deal.

My goal with all of this is, with my sources and intel, to give you enough time to adapt, to mobilize, to do what you need to do, because it is all coming down, folks. It is just a matter of when, what comes first, and what it looks like.

So stay tuned to my podcasts. I am Mike Adams, the Health Ranger. Stay tuned to my podcast at naturalnews.com and my situation updates on brighteon.com. There is a lot more coming, and check daily, because you may have only a couple of days warning and you may have to move very, very quickly. This may be with your feet, or your finances, or your preps.

So God bless you. I am going to do my best to keep you informed. And we will get through this together. We are not going to die, and we are not doomed. The unaware people may be doomed, but you and I are not doomed, so don't ever think doom and gloom.

We prepare, we adapt, we survive, we will make it through, we will rebuild. It will just be a country with far fewer people. Seriously – we

are not going to have 300 plus million people when this thing runs its course. Not even close. Take care.

A global reset is coming, and that's why I created a Global Reset Survival Guide. You can download it for free in MP3 format, or the text in pdf format, by subscribing to the natural news newsletter. Just go to globalreset.news. It is my gift to you, simply because I want like-minded people to survive.
