

Urgent! Russia at DEFCON 2, Orders All Bomb Shelters in Moscow Open, Doctors & Nurses Now on Duty!

- Russia is at DEFCON II. Defcon II is one step before an all-out nuclear war. Russia is now at DEFCON II, because they anticipate NATO will attack Moscow to try to take out Putin.
- Putin has ordered all bomb shelters open in Moscow, and ordered doctors, nurses, and operating rooms into the bomb shelters.
- Belarus has opened up 5,000 bomb shelters.
- The U.S. mid-term elections are coming up, so starting a war would be a good excuse to cancel U.S. elections and stay in power.
- India, Vietnam, and China have all ordered their citizens to leave Ukraine.
- U.S. and Europe are also at DEFCON II now.
- If the largest dam on the Depna River (in the Russian-claimed area of Ukraine) is bombed, it will:
 - destroy the water supply for a major nuclear power plant, causing a nuclear catastrophe,
 - cause major flooding,
 - destroy the civilian population that voted to join Russia - tens of thousands of people would die, causing a massive humanitarian disaster,
 - isolate a large group of Russian troops on the other side of the river, making them vulnerable to being encircled and attacked, and
 - cut off the source of water for southern Ukraine, including Crimea.
- Ukraine has a motivation to blow up the dam
 - If the nuclear cloud floats over NATO countries, Article 5 could be activated and NATO would become directly involved in the war with Russia.
- Ukraine and NATO have been launching missiles to attack the dam since September 18, using the HMARS missiles provided by the U.S.

- Ukraine has also placed sea mines in the river, which will flow down the river, so when they float down and hit the dam, they will blow up the dam.
- Whatever happens to the dam, the mainstream media will blame Russia, and be the excuse for NATO to become directly involved.
- I believe this is the false flag attack that will get NATO directly involved in the war. [Another could be the explosion of a dirty bomb in Ukraine, in which each side blames the other.]
- The former general in charge of all NATO forces in Europe, Ben Hodges, advocates the de-imperialization of Russia (destruction of Russia) into a multitude of many small states.
- Sergey Lavrov, the Russian foreign minister stated there is no reason to have a diplomatic presence in the U.S. and western European nations [in other words, there is no possibility of compromise or negotiating for peace].
- So they are going to cut off all communications to the U.S. This is just one step away from war.
- The Russian ambassador to the U.S. stated: “The U.S. has long crossed all red lines we have set. He pointed to the destruction of the Nordstream pipelines. Russian and American relations are at an all-time low. The U.S. still has a primary goal of the destruction of Russia.”
- All U.S. and Russian communication channels have been cut off, and it is likely that Russia will soon withdraw its ambassador from Washington, D.C.
- Large movements of American and Polish military forces have taken place to the border of Ukraine.
- Poland is now preparing its military forces to engage in war.
- The militarization of neighboring states is accelerating, especially in Poland.
- Poland is quickly establishing capacity to handle an additional 20,000 NATO troops.
- American and Polish troops - tens of thousands of troops are now being activated.

- The U.S. 101st airborne and 82nd airborne divisions have now been moved to Poland within a few miles of the border with Ukraine, and are conducting live-fire exercises.
- Russia, China, and North Korea have hypersonic missiles that are tested and operational, and we do not.
- We could see nuclear weapons used in the battlefield soon.
- The tragedy is that in the U.S. we don't have bomb shelters for the public.
- We are one step away from nuclear war.
